

Atul Bioscience Ltd

Project: Change in product mix of organic chemicals EC Compliance Report for EC F. No. J -11011/84/2009-IA II (I) dated April 9, 2009. Report Period April 2021 – September 2021

	T										
No.	Condition		Compliance								
A. Sp	pecific Condition										
i	The industrial effluent generation shall not exceed 326.8 m³/d. (Total process effluent generation after expansion will be 588.6 m³/d- ref. point 4 of EC)	The average m³/day only Wastewate generation m³/ Month m³/day The maxim	The average total industrial effluent generation for the report period is 12 m³/day only which is well within the limit. Details given in below table: Wastewater April May June July August September generation 21 21 21 21 21 21 21 21								
		ger Wo	astewater neration astewater neration m	326	oulated ue 6.80	Values for the period April 21 – September 21 Min. Max. Avg. 8 22 12		nber 21 Avg.			
	Out of 326.8 m³/d, 24 m³/d of high COD effluent shall be incinerated in the incinerator (of Atul Ltd as stated in point 4 of EC)	Complied. We have been segregating high COD streams (COD >50000 ppm) and same is being taken for recovery to get economic benefit. Rest lean effluent of COD <2000 ppm is finally sent to ETP for treatment. All the high COD streams are being diverted to recovery system rather than incineration. Streams containing Solvents, oils, etc. are taken for the recovery of the same and reused. Hence, there is no High COD Waste water stream remaining and therefore no incineration was done during this period.									
	Remaining 302.8 m³/d of normal effluent stream after mixing with other effluent like cooling tower (111.8 m³/d) shall be treated in ETP for primary and secondary treatment.	Complied. Normal effluent stream is further treated in Effluent Treatment Plant of Atu Ltd. (Ref. Point 4 of EC).							f Atul		

The treated effluent after confirming to the prescribed standards shall be discharged into estuary of river Par through a 4km long pipe line.

Complied.

The treated effluent after confirming to the prescribed standards is being discharged into estuary of river Par through a 4km long pipe line of Atul Ltd. (Ref. Point 4 of EC). The discharged effluent is meeting all pollution board limits and values of various parameters of treated effluent is given in **Table 1**.

The maximum values during the compliance period confirms that at no time the emission went beyond the stipulated standards. Summary is given below:

Sr No.	Parameter	Limit		Values for the period April 21 – September 21		
			Min.	Max.	Avg.	
1	рН	5.5- 9.0	7.08	7.71	7.43	
2	Temperature (°C)	40	30	30.7	30.27	
3	Colour (pt. co. scale)in units		40	70	51.67	
4	Suspended solids(mg/l)	100	35	53	44.00	
5	Phenolic Compounds (mg/l)	5	0.16	1.8	0.62	
6	Cyanides (mg/l)	0.2	ND	ND	ND	
7	Fluorides (mg/l)	2	0.48	0.93	0.77	
8	Sulphides (mg/l)	2	0.62	1.65	1.13	
9	Ammonical Nitrogen (mg/l)	50	2.76	6.4	5.03	
10	Total Chromium (mg/l)	2	ND	ND	ND	
11	Hexavalent Chromium (mg/l)	1	ND	ND	ND	
12	BOD (3 days at 27°C) (mg/l)	100	42	64	49	
13	COD (mg/l)	250	186	234	206	

ii Process emissions in the form of HCI shall be scrubbed with water and caustic scrubber and HCI recovered as by product.

Complied.

Process emissions in the form of HCI is being recovered up to the possible extent and reused partially in process. Remaining HCI is scrubbed with water and caustic scrubber.

The emissions shall be dispersed through stack of adequate height as per CPCB standards.

Complied.

The emissions is being dispersed through stack of adequate height as per CPCB standards. Gaseous emissions from process units are monitored regularly every month and same are given in **Table 2**. The same is being monitored online and connected with CPCB and GPCB.

	The gaseous emissions from the DG sets shall be dispersed through stack of adequate height as per CPCB standards. The minimum height of stack is provided using the following for CPCB: The minimum height of stack is provided using the following for CPCB: H = h+0.2x√KVA H = Total height of stack in meter. h = Height of the building in meters where the generator set is in KVA = Total generator capacity of the set in KVA. However, DG set is being used only during emergency. Acoustic enclosures Complied.								
Acoustic enclosures shall be provided to the DG set to control the noise pollution. Complied. DG Set is having inbuilt acoustic enclosure to control noise pollution.							se pollut	ion.	
iii	The company shall upload the status of compliance of the stipulated environmental clearance conditions, including results of monitored data on its website and shall update the same periodically.	including re	The status of compliance of stipulated environmental clearance conditions including results of monitored data is posted on our web site www.atulbio.co.in						
	It shall simultaneously be sent to the Regional office of MOEF, the respective Zonal office of CPCB and the State Pollution Control Board.		Compliance status report is regularly submitted to the Regional office of MOEF, the respective Zonal office of CPCB and the State Pollution Control						
	The criteria pollutant levels namely: SPM. RSPM, S02. NOx (ambient levels as well as stack emissions) or critical sectorial parameters like VOC indicated for the project shall be monitored and displayed at a convenient location near the main gate of the company in the	Complied. The critical pollutants parameters are monitored regularly on monthly basis and displayed at board at the company entrance. Details of stack results, ambient air monitoring and VOC measured in fugitive emission is given in Table 2, 3 and 4 respectively. The maximum values during the compliance period confirms that at no time the emission level went beyond the stipulated standards. Summary of stack results: Sr No. Parameter Standard Vnit Values for the period April 21 – September 21 Min. Max. Ava.

iv The company shall adopt cleaner production technology to minimize the quantity of fresh water requirement and process effluent generation.

Complied.

Steam condensate is being collected and used in place of raw water. Various wash water streams are being utilized in the further steps of the process.

V	The Company shall obtain Authorization for collection, storage and disposal of hazardous waste under the Hazardous Waste (Management, Handling and Trans boundary movement) Rules. 2008 for management of hazardous wastes and prior permission from GPCB shall be obtained for disposal of solid / hazardous waste in the TSDF.	Complied. We have obtained authorization under Haz. Waste management rules 2008 and available in our valid current CCA No. AWH 59131 for handling, storage and disposal of hazardous waste.
	The concerned company shall undertake measures for firefighting facilities in case of emergency.	Compiled. We have well established fire hydrant network. We have mutual aid with parent company - Atul Ltd for emergency help, which is located just besides our company. Atul Ltd has three nos. of fire tenders, fully adequate hydrant system and trained staff, emergency response team(ERT) of trained workers, power supply from two source with emergency backup power provision from DG set as well grid. We have detailed on-site emergency plan. Mock drills are also being carried
vi	The project authorities shall strictly comply with the rules and guidelines under Manufacture, Storage and Import of Hazardous Chemicals Rules. 1989 as amended in October, 1994 and January, 2000.	out at regular interval. Complied. We are complying with all the requirement of MSIHC rule 1989 as amended in October, 1994 and January, 2000 and having proper storage and handling system, Onsite emergency plan, Licenses, reporting, etc. The company complies with all stipulated norms mentioned in CCA by GPCB in this regard. This has been certified by our Environmental auditors, an authorized agency and nominated by GPCB; through Environmental audit every year. Latest environmental audit report by Manmade Textile Research Association (MANTRA) for year 2020-21 was submitted to you good office wide our latter dated June 26, 2021
	All Transportation of Hazardous Chemicals shall be as per the MVA. 1989.	Complied. Transportation of Hazardous chemicals are being done as per the MVA 1989.
vii	The company shall undertake following Waste Minimization measures:-	
	Metering and control of quantities of active ingredients to minimize waste.	All the liquid ingredients are being charged through measure vessels and/or

	Reuse of by-products from the process as raw materials or as raw material substitutes in other processes. Use of automated filling	Complied. HCI and solvent recovered are being used as raw material in further steps. Complied.
	to minimize spillage.	Filling is done on weighing balance manually but in controlled manner to minimize spillage.
	Use of "Close Feed' system into batch reactors.	Complied. All reactors are in close loop and connected with condensers having cooling tower water, Chilled water or Brine water supply for control of fugitive emission.
	Venting equipment through vapor recovery system.	Complied. All the reactors are equipped with vents/stacks, which are connected to either vapor recovery system consisting of condensers, ejector/vacuum pumps and/or scrubbers.
	Use of high pressure hoses for equipment clearing to reduce wastewater generation.	Complied. Many equipment like reactors, spray dryers, condenser wherever necessary are being cleaned with high pressure sparger / jet to reduce waste water generation.
viii	Fugitive emissions in the work zone environment, product, raw material storage area shall be regularly monitored.	Complied. Fugitive emissions in the work zone environment and raw material storage area is being regularly monitored by GPCB approved third party. The emission is always being confirmed to the limits.
	The emissions shall conform to the limits imposed by SPCB.	Complied. The emissions confirms the limits. The maximum values during the compliance period confirms that at no time the emission level went beyond the stipulated standards. Summary of stack results given in specific condition no. iii. The detailed results are given in Table 2
ix	The project authorities shall provide the chilled brine solution in secondary condenser for condensation of the VOCs.	Complied. Chilled brine solution is provided in secondary condenser for condensation of the VOCs.
	The project authority shall ensure that the solvent recovery shall not be less than 95%.	Complied. Solvent recovery is >95%.

	The VOC monitoring shall be carried in the solvent storage area and data submitted to the Ministry.	Complied. We are monitoring VOC as well as other chemicals in work area as per Factories Act and records are being maintained in For No. 37.VOC monitoring done on regular bases and the results are given in Table 4.
×	Solvent management shall be as follows:	
	Reactor shall be connected to chilled brine condenser system	Complied. Reactors are connected to chilled brine condenser system.
	Reactor and solvent handling pump shall have mechanical seals to prevent leakages.	Complied. Reactor and solvent handling pump do have mechanical seals to prevent leakages.
	The condensers shall be provided with sufficient HTA and residence time so as to achieve more than 95% recovery.	Complied. The condensers are provided with sufficient HTA and residence time.
	Solvents shall be stored in a separate space specified with all safety measures.	Complied. Solvents are stored in tank farms in separate tanks with proper earthing, flame arresters, lightening arresters, fencing, Fire hydrant system, Fire extinguishers, flame proof equipment, etc. safety measures.
	Proper earthing shall be provided in all the electrical equipment wherever solvent handling is done.	Complied. Double earthing is provided and regular checking and testing of the same is being done and recorded.
	Entire plant shall be flame proof. The solvent storage tanks shall be provided with breather valve to prevent losses.	Complied. Plants are equipped with Jumpers, flame proof electrical fittings and proper earthing as per the Hazardous area classification of PESO.
xi	Hazardous chemicals shall be stored in tanks in tank farms, drums, carboys, etc.	Complied. Hazardous chemicals are being stored in tanks, drums and carboys considering the storage quantity and chemical stored.
	An area of 33% green belt and selection of plant species shall be as per the guideline of CPCB.	·

xii	The Company shall harvest surface as well as rainwater from the rooftops of the buildings and storm water drains to recharge the ground water and use the same water for the various activities of the project to conserve fresh water.	We have installed 120 KL underground tank and 2 nos 30 Kl overhead tank to collect rain water from roof tops.
xiii	Occupational health surveillance of the workers shall be carried out on a regular basis and records shall be maintained as per the Factories Act.	Complied. Occupational health surveillance of the workers being carried out on regular basis.
B. Ge	neral Conditions	
i	The project authorities shall strictly adhere to the stipulations made by the GPCB.	Complied. The company adheres to the compliances and has not exceeded the stipulation. This has been certified by our Environmental auditors, an authorized agency and nominated by GPCB; through Environmental audit every year. Latest environmental audit report by Manmade Textile Research Association (MANTRA) for year 2020-21 was submitted to you good office wide our latter dated June 26, 2021
ii	No further expansion or modification in the plant shall be carried out without prior approval of the Ministry of Environment and Forests. In case of deviations or alterations in the project proposal from those submitted to this Ministry for clearance, a fresh reference shall be made to the Ministry to assess the adequacy of conditions imposed and to add additional environmental protection measures required, if any.	

iii	At no time, the emissions shall exceed the prescribed limits.	Complied. Monthly monitoring is being done by GPCB approved, NABL approved agencies. At no time, the emissions exceeded the prescribed limits during report period. Summary of stack emission is given in special condition iii.
	In the event of failure of any pollution control system adopted by the units, the unit shall be immediately put out of operation and shall not be restarted until the desired efficiency has been achieved.	Complied. No such case happened during the compliance period.
iv	The Gaseous emission (NOx, HCl, SO2 and SPM) and Particulate matter along with RSPM levels from various process units shall confirm to the standards prescribed by the concerned authorities from time to time.	Complied. The gaseous emissions (HCI) from process units confirms to the standards prescribed by GPCB through CCA Gaseous emission is regularly monitored. Results given in Table 2
	At no time, the emission levels shall go beyond the stipulated standards.	Complied. The maximum values during the compliance period confirms that at no time the emission level went beyond the stipulated standards. Summary of stack emission is given in special condition iii.
	In the event of failure of pollution control system(s) adopted by the unit, the respective unit shall not be restricted until the control measures are rectified to achieve the desired efficiency. Stack monitoring for SO2, NOx and SPM shall be carried.	Complied. No such case happened during compliance period. Whenever such incident of failure of pollution control system happened, we will stop the operation and rectify the problem and then only restart.

	The Leastine of suchieut	Caman!						
V	The Location of ambient air quality monitoring stations shall be decided in consultation with sated pollution control Board and it shall be ensured that at least one station is installed in the up wind and downwind direction as well as where maximum ground level concentration are anticipated.	that at as well ambien CPCB & List of a	are two locations had least one station is as where maximulat air monitoring. The MoEF during their bur ambient air more arms. Sr No. L 1 B	insta m grane san visit nitorin ocatio ehino	ound level concome had been slowed to our factory. In station is given to our factory. vi	Dedicated Scrubbers and stacks of appropriate height as per the central pollution control board guideline shall be provided to control the emission from various vents.	Dedicar pollutio from vo	Complied. Dedicated Scrubbers and stacks of appropriate height as per the central pollution control board guideline have been provided to control the emission from various vents. Details of stack results along with its height data is given in Table 2					
	The scrubber water shall be sent to ETP for further treatment or sell to actual end users.	The scrubber water is being sent to ETP for further treatment.						
∨ii	The overall noise level in and around the plant area shall be kept well within the standard by providing noise control measures including acoustic hoods silencers, enclosures etc. on all source of noise generation.	Complied. In built Acoustic enclosure, silencer and insulation are provided on all source of noise generation to keep over all noise level within the stipulated standards like DG set, etc.						
	The ambient noise level shall confirm to the standards prescribed under Environment(Protection) Act-1986 Rules,1989 viz 75 dBA (day time) and 70 dBA (night time).	The mo	ed. abient noise level consisted as a level consisted as a level went because monitoring date	ng the eyond	e compliance pe the stipulated :	eriod confi	ms that a

X	The project proponent shall also comply with all the environmental protection measures and safeguards proposed in project report submitted to the ministry.	Complied. Company has complied with all the environmental protection measures and safeguards proposed in the report apart from the recommendations made their in.
	All the recommendation made in respect of environmental management and risk mitigation measures relating to the project shall be implemented.	Complied. Since the project did not require EIA or public hearing, no such recommendations mentioned. However, we are committed for healthy work environment and safe work practices.
xi	The company will undertake all relevant measures for improving the socio economic condition for the surrounding area, CSR activities will be undertaken by involving local villages and administration.	Complied. Company is doing CSR activities for up gradation of surrounding area and well fare of nearby localities.
xii	The company shall undertake eco developmental measures including community welfare measures in the project area for the overall improvement of the environment.	Complied as mentioned in xi above.
xiii	A Separate environmental management cell equipped with full flagged laboratory facility shall be set up to carry out the environmental management and monitoring function.	Company has tie up with its parent company Atul Limited where separate Environmental Management Cell equipped with full-fledged laboratory

xiv	The project authorities shall provide adequate funds both recurring and non-recurring to implement the conditions stipulated by the Ministry of Environment and Forest as well as the State Government along with	Recurring cost: A separate budg requirement stip	ulated by SPCB, CPCI systems and facilities. 	diverted for any other purposes.		LIVIS MONITORING	0.9			
xv	A copy of the clearance letter shall be sent by the proponent to concerned Panchayat, Zila parishad/Municipal Corporation. Urban local body and the local NGO, if any, from who suggestions/representati on, if any, were received while processing the proposal.	Complied. Latest submission to the Panchayat, Zila parishad, District Industrial Centre was distributed on November 11, 2016. Copy of the same was submitted to Ministry vide our letter Atul/SHE/MoEF/Visit/3 dated April 4, 2017					
	The clearance letter shall also be put on the web site of the company by the proponent.	Complied. Available at com	pany's website www.at	culbio.co.in			
xvi	The implementation of the project vis-à-vis environmental action plan shall be monitored by Ministry's Regional office at Bhopal / SPCB / CPCB.	•	is monitoring through th	neir regular visits.			
xvii	The Project Proponent shall inform the public that the project has been accorded environmental clearance by the Ministry and copies of the clearance letter are available with the SPCB/Committee and may also be seen at website of the Ministry of Environment and Forest at	We informed the public through advertisement and by sending our EC to local Panchayat, Zila parishad, District Industrial Centre for further actions at their end.					

	http://www.envfor.ni.in.	
	This shall be advertised within seven days from the date of issue of the clearance letter at least in two local newspaper that are widely circulated in the region of which one shall be in the vernacular language of the locality concerned and a copy of the same shall be forwarded to the concerned Ministry's Regional office at Bhopal.	Complied. Advertisement was published and copy of the same was submitted to Ministry vide our letter Atul/SHE/MoEF/Visit/3 dated April 4, 2017.
xviii	The project authorities shall inform the Regional Office as well as the Ministry, the date of financial closures and final approval of the project by the concerned authorities and the date of start of the project.	Start date : April 2009 Completion date : March 2010
9	The Ministry may revoke or suspend the clearance if implementation of any of the above conditions is not satisfactory.	Noted.
10	The Ministry reserves the right to stipulate additional conditions, if found necessary. The company in a time bound manner will implement these conditions.	Noted.
11	Any appeal against this Environment clearance shall lie with the national appellate authority, if preferred, within a period of 30 days as prescribed under section 11 of National Environment Appellate Authority Act, 1997.	Noted.
12	The above conditions will be enforced, interalia under the provisions of the Water (Prevention and Control of Pollution)	Noted.
